## **Policy & Procedure 1 - Establishing and Managing the ASAR Course Assessor Pool**

### **1. Preamble**

ASAR's objective is to promote high standards of medical sonography in Australia which includes setting uniform, minimum standards of Sonographer education by assessing and accrediting courses in all disciplines of sonography.

This policy details our practices for establishing and managing the ASAR Course Assessor Pool (the Pool), from which members of the ASAR Course Assessment Committees are chosen. It also details the way the competency requirements of the Pool members are met and maintained.

### **2. Policy Principles**

ASAR is committed to ensuring that all accredited Sonography courses meet the eight Standards for the Accreditation of Sonography Courses (SASC). In order to achieve this, the application procedures must be conducted in accordance with the accreditation principles identified below. It is the responsibility of the members of the Pool when participating in accreditation activities to ensure these principles are adhered to.

ASAR Course Assessment Committee members will be selected from a pool of people who have skills and expert knowledge of sonography, specialist disciplines, and/or expertise in education. Committees will be established in response to changing demands, expectations and needs of the course seeking accreditation.

### **3. Accreditation Principles**

The accreditation principles underpinning the approach to accreditation are:

#### **Legitimacy**

The accreditation procedure must be legitimate and acceptable to stakeholders. Such legitimacy includes impartiality in relation to particular stakeholder groups; and appropriate respect for the academic autonomy of course providers. The accreditation procedure must also be consistent with current legislation and guidelines.

#### **Validity**

The accreditation procedure must be valid in that the procedures are appropriate for assessing the determination of criteria. These criteria must be evidence-based and explicitly related to the necessary graduate competency outcomes and other specified purposes of the accreditation procedure. The period and status of accreditation must be appropriate to the nature of the programs and developments in the professional field.
