#### **Validity**

The accreditation procedure must be valid in that the procedures are appropriate for assessing the determination of criteria. These criteria must be evidence-based and explicitly related to the necessary graduate competency outcomes and other specified purposes of the accreditation procedure. The period and status of accreditation must be appropriate to the nature of the programs and developments in the professional field.

#### **Efficiency**

The accreditation procedure must cover what is necessary and sufficient and not be unnecessarily burdensome for course providers, Course Assessment Committee members or other participants.
